Information regarding cross-use of Approvals of Manufacturer (AoM) and Approvals of Service Supplier (AoSS)

Please be informed that according to the DNV GL rules the AoM and AoSS certificates are now accepted for cross-use. This means that a certificate issued according to one rule set will be accepted for vessels classed according to any valid DNV GL rule set (the DNV rules, the GL rules, and the DNV GL rules when published).

The above is based on the DNV GL Rules for Classification No.DNVGL-RU-0050 – “General Regulations”, which states:

4.1.2 The following legacy certificates will on a general basis be accepted for cross use between the legacy rule sets.

Table 1 Certificates accepted for cross use between legacy rule sets

<i>DNV</i>	<i>GL</i>	<i>Comment</i>
<i>Service supplier certificate of approval</i>	<i>Service supplier certificate of approval</i>	When a common DNV GL rule set is published, all renewals and new approvals shall be based on this rule set.
<i>Approval of manufacturer certificate</i>	<i>Approval of welding shops certificate Approval of material manufacturers certificate</i>	When a common DNV GL rule set is published, all renewals and new approvals shall be based on this rule set.

If you have any questions, please do not hesitate to contact your closest DNV GL office.

Sincerely
for Division Classification

Geir Dugstad
Director, Division Classification
